CHALLENGE SHEET

Dns Ecs Bypass

A DNS service trusts client-supplied ECS for access control.

DIFFICULTY	TRACK	HOST PORT	LAB ID
MEDIUM	NETWORK	5353	dns-ecs-bypass

EASY | MEDIUM | HARD | INSANE

VERIFY THE SOLVE

```
python3 ../scripts/check.py dns-ecs-bypass
```

Goal

Retrieve the flag from the protected zone.

Setup

Run the container and interact with the service on `127.0.0.1:5353/udp`.

Brief

[redacted] DNS [redacted] EDNS Client Subnet (ECS): [redacted] .[redacted]
