CHALLENGE SHEET

Duckvault

A records portal leaks an internal reference through broken access control and weak authorization.

DIFFICULTY	TRACK	HOST PORT	LAB ID
MEDIUM	WEB	8000	duckvault

EASY · **MEDIUM** · HARD · INSANE

VERIFY THE SOLVE

```
python3 ../scripts/check.py duckvault
```

Brief

DuckVault is an employee records portal.

You have a normal employee account. The portal shows assigned records and loads data from internal API endpoints.

Some records were moved from a legacy archive.

Setup

Start the lab.

```
docker compose up -d
```

The lab runs on port 8378.

Open `http://localhost:8378/login`.

Use this account.

```
Username: intern
Password: intern123
```

Goal

Find the flag.

Check your solve from the repository root.

```
python3 scripts/check.py labs/web/duckvault
```

The flag format is `duck{...}`.
