CHALLENGE SHEET

Shopx Dep Confusion

an npm scope mapping gap sends an internal package name to the wrong registry

DIFFICULTY	TRACK	HOST PORT	LAB ID
HARD	WEB	8080	shopx-dep-confusion

EASY · MEDIUM · HARD · INSANE

VERIFY THE SOLVE

```
python3 ../scripts/check.py shopx-dep-confusion
```

Brief

ShopX moved its storefront build pipeline to npm earlier this year. You have been handed access to the public storefront ahead of a security assessment. Nothing else. Investigate the surface, follow what it tells you, and reach the protected flag.

Setup

Open `http://localhost:8080`.

Everything the lab needs runs inside the compose network. Nothing reaches outside it.

Goal

Retrieve the flag held by ShopX's internal billing service.

Check a solve from the repository root:
