CHALLENGE SHEET

Duckleak

An internal vault app that keeps its PIN and promo code inside the APK.

DIFFICULTY	TRACK	HOST PORT	LAB ID
EASY	BINARY	8080	duckleak

EASY MEDIUM HARD INSANE

VERIFY THE SOLVE

```
• python3 ../scripts/check.py duckleak
```

Brief

DuckCorp ships NestGuard, an internal Android app for staff. It keeps a vault of private files and a staff discount behind a PIN. The developer shipped the build in a hurry. Download the APK and open the vault.

Setup

Run these from the lab directory:

```
docker compose up -d
```

Open `http://localhost:8080` and download `duckleak.apk`. Install it on an Android emulator or device:

```
adb install duckleak.apk
```

You need a decompiler such as JADX. Static analysis of the APK is enough for a full solve. Running the app needs an emulator or device plus adb (Android platform-tools).

Goal

Unlock the vault, reach the employee discount, and recover the flag. Verify the solve from the lab directory:

```
python3 ../../../scripts/check.py .
```

See how to play for the usual solve loop.
